

Advancing Tomorrow

Global Leader in Oil and Gas Storage and Distribution

Advancing Tomorrow

**Aquarius Energy is a global leader in bulk liquid storage and distribution,
facilitating the global movement of energy products.**

Our global network of strategically located operations allows us to deliver solutions across services, products, and continents. Aquarius Energy offers services encompassing the entire bulk liquid fuel storage and distribution spectrum. From state-of-the-art terminals to efficient logistics solutions, we cater to the diverse requirements of our global clientele.

Our purpose at Aquarius Energy is to facilitate the seamless movement of energy products globally. We employ a comprehensive strategy emphasising operational excellence, technological advancement and sustainable practices to achieve this.

www.aquariusenergy.com

Heating & Blending

Temperature control is key to bulk liquid energy products. Aquarius Energy excels in providing custom formulations and meeting specific product requirements.

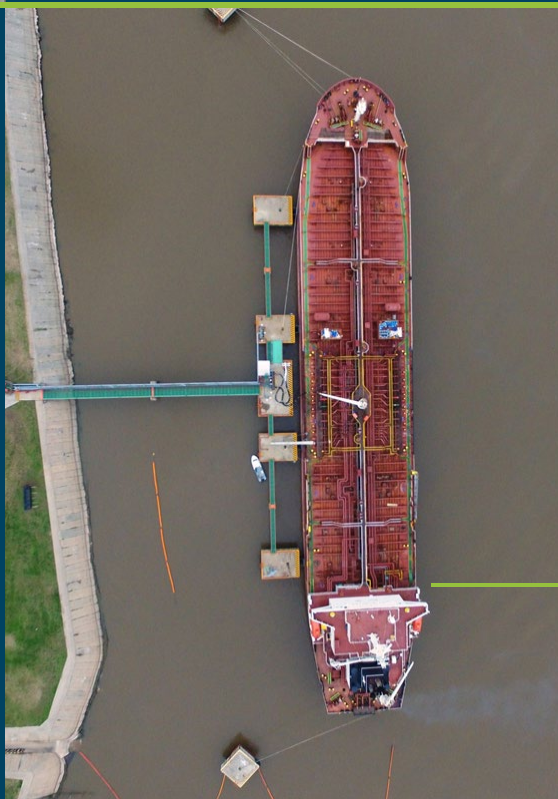

Documents & Stock Reports

Aquarius Energy offers comprehensive documentation services, including stock reports, to ensure accurate record-keeping and efficient management of products.

Marine Operations

Our marine operations services encompass a range of critical activities that facilitate the safe and efficient unloading of vessels and the transfer of bulk liquid products.

Storage & Distribution

Aquarius Energy provides comprehensive services for receiving, handling, and distributing bulk liquid products to storage tanks and associated infrastructure.

Our Operations

At Aquarius Energy, collaboration is the key to unlocking success. As you explore our world map, you'll witness the breadth and depth of Aquarius Energy's global footprint. We serve as your dependable partner in oil and gas storage and distribution from the Americas to Europe, the Middle East to Africa.

Welcome to a world where energy flows seamlessly, innovation meets tradition, and Aquarius Energy advances tomorrow.

Marine Operations

Our marine operations services encompass a range of critical activities that facilitate the safe and efficient unloading of vessels and the transfer of bulk liquid products.

Vessel Coordination

Our experienced team works closely with vessel operators and port authorities to coordinate vessel arrival, berthing, and discharging operations. We meticulously plan and manage the logistics to ensure smooth operations and minimise downtime.

Product Handling

Aquarius Energy specialises in efficient product handling and transshipment services. We have well-equipped terminals and infrastructure to accommodate various vessel sizes and types. Our skilled personnel and advanced equipment enable us to handle various bulk liquid products precisely and carefully.

Safety and Compliance

Safety is our utmost priority in all marine operations. We adhere to stringent safety protocols, regulations, and industry best practices to ensure the well-being of our personnel, vessels, and the environment. Our commitment to safety extends to comprehensive risk assessments, emergency response plans, and ongoing training programs.

Quality Control and Documentation

We have robust quality control measures to ensure the integrity and compliance of products during marine operations. Our dedicated teams facilitate thorough inspections, sampling, and testing to maintain the highest quality standards. Accurate documentation and record-keeping are integral to our service, ensuring quality and transparency.

Real-Time Data

Aquarius Energy utilises advanced data management systems to capture and analyse real-time data related to inventory. This ensures that stock reports are up to date, providing clients with the most current and accurate information. Our clients can make timely decisions regarding supply and demand, optimising their operations and maximising efficiency.

Customised Reporting

Clients may have specific reporting needs and preferences. We offer customisable reporting options to tailor stock report format, frequency, and content to individual requirements. Whether periodic or ad-hoc reporting, we work closely with our clients to deliver documentation aligning with their business objectives.

Compliance and Regulatory Documentation

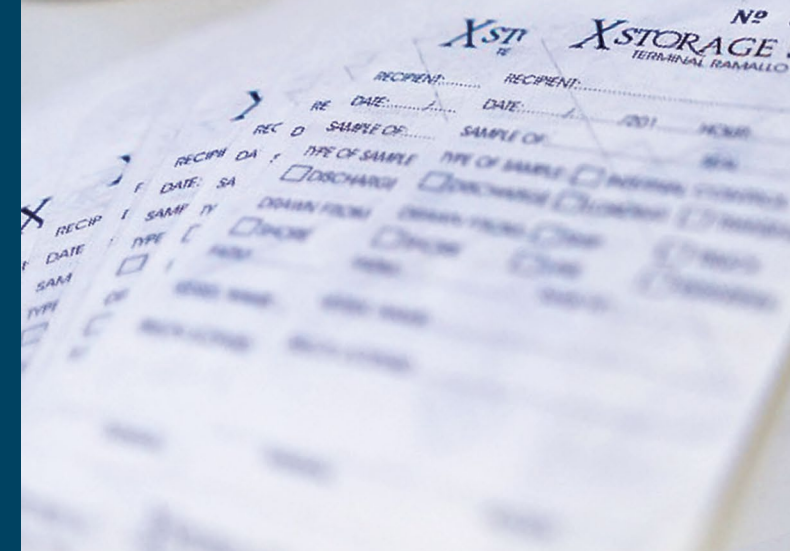

Aquarius Energy is committed to adhering to industry regulations and compliance standards. We meticulously maintain documentation related to compliance requirements, including licenses, permits, certifications, and regulatory reporting. By ensuring comprehensive compliance documentation, we assist our clients in meeting their legal obligations and operating within the framework of industry regulations.

Data Security and Confidentiality

We recognise the importance of data security and confidentiality in handling sensitive information. Aquarius Energy employs robust security measures and protocols to safeguard client data.

Documentation & Stock Reports

Aquarius Energy offers comprehensive documentation services, including stock reports, to ensure accurate record-keeping and efficient management of products. Our dedication to meticulous documentation enables our clients to have clear visibility into their inventory, streamline operations, and make informed decisions based on reliable data.

Storage & Distribution

Aquarius Energy provides comprehensive services for receiving, handling, and distributing bulk liquid products to storage tanks and associated infrastructure. With our expertise, state-of-the-art facilities, and commitment to excellence, we ensure safe, reliable, and responsible operations throughout the entire supply chain.

Receipt of Petroleum Products

We specialise in the efficient and secure receipt of products from various sources, such as marine vessels, pipelines, and trucks. Our well-trained personnel and advanced equipment carefully oversee the transfer process, ensuring accurate measurement, quality control, and adherence to safety protocols.

Handling and Storage

Aquarius Energy operates modern and strategically located storage facilities with tanks to accommodate different bulk liquid products. Our dedicated team manages the handling and storage operations with utmost care and precision, implementing strict safety protocols and employing state-of-the-art technology for inventory management.

Tank Management

We undertake comprehensive tank management services, including routine inspections, maintenance, and cleaning, to ensure the integrity and optimal functioning of storage tanks. Our proactive approach to tank management minimises the risk of contamination, product loss, and operational disruptions, supporting safe and secure product storage.

Inventory Control and Monitoring

At Aquarius Energy, we understand the critical importance of accurate inventory control and monitoring. Through advanced systems and processes, we track and manage the inventory levels of products in real time, allowing for effective planning and forecasting.

Distribution and Logistics

Efficient distribution and logistics are paramount in ensuring the timely delivery of products to our customers. Aquarius Energy leverages its extensive transport infrastructure network, including pipelines, trucks, and terminals, to facilitate seamless product movement. Our logistics experts work alongside our customers to optimise routes, manage scheduling, and coordinate with partners to ensure prompt and reliable logistics.

Ancillary Infrastructure Support

We offer comprehensive support for ancillary infrastructure such as pumps, meters, pipelines, and loading/unloading facilities. Our dedicated technicians conduct regular maintenance, inspections, and repairs to ensure the smooth operation and reliability of the infrastructure. We prioritise safety, efficiency, and compliance with regulatory standards in operations worldwide.

Storage &
Distribution

The logo for GPS CHEMOIL is displayed on the side of a large white storage tank. It features a stylized graphic of a red and blue wave or flame above the company name. 'GPS' is written in red, and 'CHEMOIL' is written in blue.

GPS CHEMOIL

Heating & Blending

Temperature control is key to bulk liquid energy products. Aquarius Energy excels in providing custom formulations and meeting specific product requirements.

Heating Services

Our heating services involve carefully controlled heating processes to achieve the desired temperature range for bulk liquid energy products. We utilise state-of-the-art heating equipment and advanced technology to ensure precise temperature control throughout the heating process. By bringing the products to the appropriate temperature, we enhance their flow characteristics, facilitate efficient handling, and enable further processing and transportation.

Blending Services

Aquarius Energy excels in providing blending services to create custom formulations and meet specific product requirements. Our experienced technicians meticulously blend different products, additives, or components according to the precise specifications provided by our clients. We ensure that the desired product characteristics, such as viscosity, density, octane rating, or specific chemical properties, are achieved through careful formulation and blending.

Quality Control

Quality control is at the core of our heating and blending services. We have robust quality control measures to monitor and verify product characteristics, composition, and properties before, during, and after the heating and blending. Our state-of-the-art facilities enable us to facilitate and conduct quality checks, ensuring that the final products meet the required standards and client specifications.

Process Optimization

Aquarius Energy is committed to process optimisation to maximize efficiency, minimise waste, and reduce energy consumption in our heating and blending operations. We continuously evaluate and improve our processes, utilising advanced technology and best practices to enhance productivity, reduce operational costs, and minimise environmental impact.

Customized Solutions

We understand that each client's requirements may vary, and we pride ourselves on delivering customised solutions. Our teams work closely with clients to understand their needs and develop tailored heating and blending processes to meet their unique product specifications. We strive to exceed expectations by providing flexible and reliable services that add value to our client's operations.

Sustainability & Accreditation

Aquarius Energy applies global standards and strategically manages its portfolio, driving day-to-day operations and fostering business development within our global network.

At Aquarius Energy, we recognise the critical importance of sustainable practices in the energy industry. We are committed to conducting safe, reliable, and responsible operations, ensuring the health and safety of our employees and the environment, and contributing to the communities in which we operate.

Our terminals have integrated management systems and are approved according to various industry-related accreditations ensuring global best-practices.

Health and Safety of People and the Environment

The well-being of our people and the preservation of the environment are paramount to us. We prioritise stringent health, safety, and environmental standards across all our operations. By fostering a safety culture, implementing robust risk management protocols, and employing sustainability practices, we strive to minimise our impact and create a better world.

Corporate Social Responsibility / Communities

At Aquarius Energy, we believe in giving back to the communities that support us. Through our sustainability initiatives, we actively engage in projects and partnerships that foster sustainable development and social well-being, a positive and lasting impact on society.

Ethics and Compliance

Ethics and compliance are integral to our corporate philosophy. We adhere to the highest ethical standards in all operations and comply with local and international regulations. Our commitment to transparency, integrity, and responsible business conduct ensures that we operate in a manner that upholds the trust and confidence of our stakeholders.

Code of Conduct

Aquarius Energy's Code of Conduct outlines the principles and standards that guide our actions and behaviours. It serves as a compass for our employees, reinforcing our commitment to professionalism, integrity, and ethical conduct.

Raising Concerns

We provide multiple avenues for individuals to raise concerns regarding ethical issues or potential violations of our policies. Whether through phone or online channels, we encourage employees, partners, and stakeholders to voice their concerns confidentially. Whistleblower protection is critical to our commitment to fostering a safe and ethical work environment.
